

Dolibarr ERP Implementation Guide

Complete Step-by-Step Manual for Company Implementation

Introduction

Welcome to the comprehensive Dolibarr ERP implementation guide. This document will walk you through every step needed to successfully implement Dolibarr ERP for your company, from initial setup to advanced configuration and daily operations.

What You'll Learn:

This guide covers complete ERP implementation including system configuration, module setup, user management, business process configuration, and best practices for successful adoption.

Implementation Timeline

Week 1-2: Foundation Setup

Initial configuration, company details, user setup, and core module activation

Week 3-4: Data Migration

Import products, customers, suppliers, and historical data

Week 5-6: Process Configuration

Set up sales, purchasing, inventory, and accounting processes

Week 7-8: Training & Testing

User training, system testing, and process validation

Week 9+: Go Live & Support

Launch system, monitor operations, and provide ongoing support

Phase 1: Initial System Setup

Configure basic system settings and access Dolibarr

1 Access Dolibarr Admin Panel

Login to Dolibarr:

Open your web browser and navigate to your Dolibarr installation URL (e.g., <https://yourdomain.com/dolibarr>)

Use Default Credentials:

Username: admin Password: [password set during installation]

⚠ Security First:

Change the default admin password immediately after first login. Go to Home → Top Menu → User Icon → Edit Profile

2

Configure System Settings

Navigate to Setup:

Go to:

Home → Setup → Company/Foundation

Key Configuration Areas:

- Language and localization settings
- Date and time formats
- Currency settings
- Tax configuration

3

Set Language & Regional Settings

Set Default Language:

Setup → Display → Language: Select your preferred language (e.g., English)

Configure Date Format:

Setup → Display → Date Format: Choose format (DD/MM/YYYY or MM/DD/YYYY)

Set Timezone:

Setup → Other → Timezone: Select your company's timezone

Phase 2: Company Information Setup

Configure your company details and legal information

4 Enter Company Details

Access Company Settings:

Go to:
Home → Setup → Company/Foundation

Field	Description	Example
Company Name	Legal business name	ABC Corporation Ltd
Address	Physical business address	123 Business Street
Zip/Postal Code	Postal code	10001
Town/City	City name	Lagos
State/Province	State or region	Lagos State
Country	Select from dropdown	Nigeria
Phone	Business phone number	+234 xxx xxx xxxx
Email	Business email	
Website	Company website URL	www.company.com

5

Configure Tax & Legal Information

Tax Identification:

Enter your company's Tax ID, VAT number, or TIN number in the appropriate fields

Professional IDs:

Add professional IDs (SIREN, SIRET, etc.) if applicable in your country

Registration Numbers:

Enter company registration number with relevant authorities

Pro Tip:

These details will appear on all invoices, quotations, and official documents. Ensure accuracy to comply with legal requirements.

6

Upload Company Logo

Prepare Your Logo:

Use a high-quality image file (PNG or JPG), recommended size: 200x200 pixels minimum

Upload Logo:

In Company/Foundation setup page, click "Choose file" under Logo section and upload your image

Verify Display:

The logo will appear on documents, invoices, and quotations

Phase 3: Module Activation & Configuration

Enable necessary modules for your business operations

7 Understanding Dolibarr Modules

Dolibarr uses a modular architecture. Enable only the modules you need for your business operations.

Core Business

Third parties, Products, Invoices, Orders, Quotations

Financial

Bank accounts, Expenses, Accounting, Tax management

Inventory

Stock management, Warehouses, Shipments

HR & Projects

Employees, Time tracking, Projects, Tasks

Communication

Email campaigns, Surveys, Subscriptions

Reporting

Statistics, Reports, Business intelligence

8

Activate Essential Modules

Access Module Settings:

Go to:

Home → Setup → Modules/Applications

Essential Modules Checklist:

- ☐ **Third Parties** - Manage customers and suppliers
- ☐ **Products/Services** - Product catalog management
- ☐ **Invoices** - Customer billing
- ☐ **Orders** - Sales order management
- ☐ **Proposals** - Quotations/estimates
- ☐ **Supplier Invoices** - Supplier bill management
- ☐ **Bank/Cash** - Financial management
- ☐ **Accounting** - Double-entry bookkeeping
- ☐ **Stock** - Inventory management
- ☐ **Agenda** - Calendar and events

How to Activate:

Click the "On/Off" toggle next to each module name. When activated, the module appears in the main menu.

9

Configure Module-Specific Settings

After activating a module:

Click the gear/settings icon next to each activated module to configure specific options

Important Settings to Configure:

- **Invoices:**

Numbering format, payment terms, default values

- **Products:**

Stock management rules, pricing options

- **Orders:**

Order workflow, approval process

- **Bank:**

Account types, reconciliation options

Phase 4: User Management & Permissions

Set up users, roles, and access controls

10 Create User Accounts

Access User Management:

Go to:

Home → Users & Groups → New User

Fill User Information:

Field	Required?	Description
Login	Yes	Unique username for system access
Password	Yes	Strong password (min 8 characters)
Lastname	Yes	Employee's last name
Firstname	Yes	Employee's first name
Email	Yes	Email for notifications
Phone	No	Contact phone number
Employee	No	Check if user is an employee

Save User:

Click "Create" button at the bottom of the form

11 Define User Roles & Permissions

Edit User Permissions:

After creating user, click on their name → "Permissions" tab

Common Role Definitions:

Role	Typical Permissions	Use Case
Administrator	All permissions	IT staff, system managers
Sales Manager	Read/Write: Customers, Invoices, Orders, Proposals	Sales team leaders
Sales Rep	Read: All, Write: Proposals, Own customers	Sales representatives
Accountant	Read/Write: Invoices, Bank, Accounting, Reports	Finance team
Warehouse Manager	Read/Write: Stock, Products, Shipments	Inventory management
Purchasing Manager	Read/Write: Suppliers, Supplier invoices, Purchase orders	Procurement team
Viewer	Read-only access to selected modules	Executives, auditors

Security Best Practice:

Follow the principle of least privilege - grant users only the permissions they need to perform their job functions.

12 Create User Groups (Optional)

Access Groups:

Go to:

Home → Users & Groups → Groups → New Group

Benefits of Groups:

- Assign permissions to multiple users at once
- Easier permission management
- Better organization of users by department

Create Group:

Enter group name (e.g., "Sales Team", "Finance Department") and description

Add Users to Group:

After creating group, go to "Users" tab and add members

Phase 5: Products & Services Setup

Create and manage your product/service catalog

13 Create Product Categories

Access Categories:

Go to:

Products/Services → Categories → New Category

Why Use Categories:

- Organize products logically
- Easier searching and filtering
- Better reporting and analysis
- Streamlined catalog management

Example Categories:

Electronics, Furniture, Software Services, Consulting Services, Raw Materials, etc.

14 Add Products/Services

Create New Product:

Go to:

Products/Services → New Product/Service

Field	Description	Tips
Nature	Product or Service	Product = physical item, Service = intangible
Reference	Unique product code/SKU	Use consistent naming: PROD001, SVC001
Label	Product name	Clear, descriptive name
Status	On sale or Not on sale	Control product availability
Selling Price	Price to customers	Can have multiple price levels
Unit	Measurement unit	Piece, Hour, Kg, Meter, etc.
VAT Rate	Tax percentage	Select applicable tax rate
Description	Detailed product info	Appears on documents
Category	Product classification	Assign to created categories

Advanced Features:

- **Variants:**

Create product variants (size, color, etc.)

- **Images:**

Upload product images for better visualization

- **Stock Management:**

Enable if tracking inventory

- **Supplier References:**

Link products to supplier catalogs

15

Configure Stock Management (For Products)

Enable Stock Module:

Ensure "Stock" module is activated in Setup → Modules

Set Stock Parameters:

For each product, go to "Stock" tab and configure:

- **Track stock:**

Enable inventory tracking

- **Stock alert:**

Set minimum stock level alert

- **Stock value method:**

FIFO, LIFO, or weighted average

- **Initial stock:**

Enter starting inventory quantity

16 Set Up Multi-Price Levels (Optional)

Enable Multi-Price:

Setup → Products/Services → Enable "Multi-price levels"

Use Cases:

- Wholesale vs Retail pricing
- Volume discounts
- Customer tier pricing (Gold, Silver, Bronze)
- Regional pricing differences

Configure Prices:

In product page, go to "Prices" tab and define different price levels

17 Bulk Import Products (Optional)

For Large Catalogs:

If you have many products, use CSV import feature

Prepare CSV File:

Create spreadsheet with columns: Reference, Label, Price, VAT Rate, Description, etc.

Import:

Go to: Tools → Import → Products/Services → Upload CSV file

Template Available:

Dolibarr provides a sample CSV template. Download it first to ensure correct format.

Phase 6: Third Parties - Customers & Suppliers

Set up your business partners and contacts

18 Understanding Third Parties

In Dolibarr, "Third Parties" refers to any external organization you do business with - customers, suppliers, prospects, or partners.

Third Party Types:

- **Customer:**
Buys your products/services
- **Supplier:**
Provides goods/services to you
- **Prospect:**
Potential customer (leads)
- **Customer + Supplier:**
Entity can be both

19 Add Customer/Third Party

Create New Third Party:

Go to:

Third Parties → New Third Party

Section	Fields	Details
Basic Info	Name, Alias, Type	Company name and classification
Customer/ Prospect	Check if customer, Assign code	Enable customer features
Supplier	Check if supplier, Assign code	Enable supplier features
Address	Street, Zip, City, State, Country	Physical location details
Contact Info	Phone, Email, Website	Communication channels
Tax Info	VAT number, Tax regime	Tax identification
Payment Terms	Default payment condition	e.g., Net 30 days
Price Level	Select price tier	If using multi-price levels

Save Third Party:

Click "Create" button to save the record

20 Add Contacts/Representatives

Add Contact Person:

After creating third party, go to their profile → "Contacts" tab → "New Contact"

Contact Information:

- Civility (Mr., Mrs., Ms.)
- First Name & Last Name
- Job Title/Position
- Email address
- Phone number(s)
- Contact roles (billing, shipping, technical, etc.)

Best Practice:

Add multiple contacts with specific roles (billing contact, technical contact, sales contact) to streamline communication and document routing.

21 Configure Customer-Specific Settings

Payment Methods:

In customer profile, specify preferred payment methods (check, bank transfer, credit card, etc.)

Credit Limit:

Set maximum outstanding amount allowed for customer

Default Delivery Address:

Add shipping addresses in "Addresses" tab if different from main address

Categories:

Assign customers to categories for segmentation (VIP, Regular, Wholesale, etc.)

22 Bulk Import Third Parties (Optional)

Large Database Import:

For migrating existing customer/supplier databases

Prepare Data:

Create CSV file with: Name, Address, Email, Phone, Type (Customer/Supplier), etc.

Import Process:

Go to: Tools → Import → Third Parties → Upload CSV

Data Quality:

Clean and validate your data before import. Test with a small batch first.

Phase 7: Accounting & Financial Configuration

Set up chart of accounts and financial parameters

23 Enable Accounting Module

Activate Module:

Setup → Modules → Enable "Accounting" (Double-entry accounting)

Accounting vs Accountancy:

- **Accounting (Bookkeeping):**

Full double-entry accounting system

- **Accountancy:**

Expert accounting features for accountants

- Most businesses need the "Accounting" module

24 Set Up Chart of Accounts

Access Chart of Accounts:

Accounting → Setup → Chart of Accounts

Choose Standard Template:

Dolibarr provides standard charts based on accounting standards (IFRS, US GAAP, country-specific)

- Select template matching your country/region
- Click "Load" to import standard accounts

Account Type	Code Range	Examples
Assets	1000-1999	Bank, Cash, Accounts Receivable, Inventory
Liabilities	2000-2999	Accounts Payable, Loans, Taxes Payable
Equity	3000-3999	Capital, Retained Earnings
Revenue	4000-4999	Sales Revenue, Service Income
Expenses	5000-6999	Salaries, Rent, Utilities, Supplies

Customize as Needed:

Add, modify, or delete accounts to match your business structure

25 Configure Bank Accounts

Add Bank Account:

Bank/Cash → Bank Accounts → New Bank Account

Account Details:

- **Label:**

Account name (e.g., "Main Business Account")

- **Bank:**

Select or create bank institution

- **Account Number:**

Full account number

- **IBAN:**

International bank account number (if applicable)

- **Currency:**

Account currency

- **Initial Balance:**

Starting balance

- **Account Code:**

Link to chart of accounts

Multiple Accounts:

Set up separate accounts for:

- Operating/checking accounts
- Savings accounts
- Petty cash
- Payment gateway accounts (PayPal, Stripe)

26 Set Up Tax Rules

Configure VAT/Sales Tax:

Setup → Dictionaries → Taxes (VAT)

Add Tax Rates:

Create tax rates applicable to your business:

- Standard rate (e.g., 7.5% VAT in Nigeria)
- Reduced rate (if applicable)
- Zero rate
- Exempt

Link Tax to Accounts:

Associate each tax rate with appropriate accounting accounts for proper journal entries

27 Configure Payment Terms

Access Payment Terms:

Setup → Dictionaries → Payment Terms

Common Payment Terms:

- Immediate payment (Due on receipt)
- Net 7 days
- Net 15 days
- Net 30 days
- Net 60 days
- End of month (EOM)
- 2/10 Net 30 (2% discount if paid within 10 days)

Set Default:

Choose a default payment term for customer invoices

28 Set Fiscal Year

Define Fiscal Year:

Accounting → Setup → Fiscal Period

Create Fiscal Period:

- Start date (e.g., January 1)
- End date (e.g., December 31)
- Label (e.g., "FY 2024")
- Status (Open/Closed)

Note:

Closed fiscal years prevent modifications to financial records, ensuring data integrity for completed periods.

Phase 8: Sales Process Configuration

Configure quotations, orders, and invoicing workflow

29 Understand Sales Workflow

Typical Sales Flow in Dolibarr:

1. Commercial Proposal (Quotation)

Create and send quote to prospect/customer

2. Customer Order

Convert accepted quote to sales order

3. Shipment (If applicable)

Process and track product delivery

4. Invoice

Create invoice from order or directly

5. Payment

Record customer payment

Start New Proposal:

Commercial → Proposals → New Proposal

Fill Proposal Details:

- **Third Party:**

Select customer/prospect

- **Date:**

Proposal date (default: today)

- **Valid Until:**

Expiration date

- **Reference:**

Auto-generated or manual

- **Project:**

Link to project (optional)

Add Products/Services:

- Click "Add Line"
- Select product or add free text line
- Set quantity and price
- Apply discounts if needed
- Verify tax calculation

Add Notes:

Include terms, conditions, and additional information

Validate Proposal:

Click "Validate" to finalize and make it ready to send

Generate PDF:

Click "Generate PDF" to create professional quote document

Send to Customer:

Click "Send by email" or download PDF to send manually

31 Convert to Sales Order

When Quote is Accepted:

Open the proposal → Click "Create Order"

Order Creation:

System automatically creates order with same details

Validate Order:

Review order details and click "Validate"

✓ Benefits:

Converting quote to order maintains data consistency and tracks the complete sales cycle.

32 Create Customer Invoice

From Order:

In order view → Click "Create Invoice" button

OR Create Directly:

Invoices → New Invoice → Select customer → Add lines

Invoice Types:

- **Standard Invoice:**
Regular invoice
- **Replacement Invoice:**
Replaces previous invoice
- **Credit Note:**
Return/refund
- **Deposit Invoice:**
Down payment
- **Proforma:**
Not official invoice

Configure Invoice:

- Payment terms
- Payment method
- Bank details (for wire transfers)
- Due date

Validate Invoice:

Click "Validate" - this locks the invoice and generates invoice number

Send to Customer:

Generate PDF and email directly from Dolibarr

33 Record Payment

Enter Payment:

Open invoice → Click "Enter Payment"

Payment Details:

- Payment date
- Payment method (check, bank transfer, cash, card)
- Amount received
- Bank account (where money was received)
- Transaction reference

Partial Payments:

System supports multiple partial payments until invoice is fully paid

Automatic Updates:

Recording payment automatically:

- Updates invoice status to "Paid"
- Updates bank balance
- Creates accounting entries
- Updates customer account balance

34 Configure Numbering Rules

Customize Document Numbers:

Setup → Module Setup → [Module] → Numbering Rules

Example Formats:

- Proposals: PROP{YYYY}{MM}-{0000}
- Orders: ORD{YYYY}-{0000}
- Invoices: INV{YY}{MM}-{0000}

Best Practice:

Use consistent, logical numbering that includes year/month for easy tracking and filing.

Phase 9: Purchase & Supplier Management

Configure procurement and supplier invoice workflow

35 Enable Supplier Modules

Required Modules:

- ☐ **Supplier Invoices** - Track supplier bills
- ☐ **Supplier Orders** - Purchase order management
- ☐ **Supplier Proposals** - Request for quotes

Activate:

Setup → Modules → Enable each required module

36 Create Supplier Order (Purchase Order)

New Purchase Order:

Suppliers → Orders → New Order

Order Details:

- Select supplier from third parties
- Order date
- Expected delivery date
- Delivery address
- Payment terms

Add Items:

- Select products from catalog
- Enter quantity needed
- Verify purchase price
- Check tax rates

Approve & Send:

Validate order → Generate PDF → Send to supplier

37 Receive Goods

Record Receipt:

Open purchase order → Click "Create Reception"

Reception Details:

- Date received
- Quantities received (can be partial)
- Quality check notes
- Storage location

Stock Impact:

Validating reception automatically updates:

- Product stock levels
- Warehouse inventory
- Purchase order status

38 Record Supplier Invoice

From Purchase Order:

Open purchase order → Click "Create Invoice"

OR Create Directly:

Suppliers → Invoices → New Invoice

Match with Purchase Order:

Ensure invoice details match PO (prices, quantities, terms)

Three-Way Matching:

- Purchase Order
- Goods Receipt
- Supplier Invoice

All three should match before approving payment

Validate Invoice:

After verification, validate to record in accounting

39 Pay Supplier Invoice

Record Payment:

Open supplier invoice → Click "Enter Payment"

Payment Information:

- Payment date
- Payment method
- Amount paid
- Bank account (from which payment was made)
- Check/transaction number

Cash Flow Management:

Monitor payment due dates to maintain good supplier relationships and avoid late payment penalties.

Phase 10: Inventory & Stock Management

Configure warehouses and manage stock movements

40 Create Warehouses

Access Warehouse Setup:

Products/Services → Warehouses → New Warehouse

Warehouse Details:

- **Reference:**

Unique warehouse code (WH001, WH002)

- **Label:**

Warehouse name (Main Warehouse, Branch A)

- **Location:**

Physical address

- **Description:**

Additional details

- **Status:**

Open/Closed

Multiple Locations:

Create separate warehouses for:

- Different physical locations
- Consignment stock
- Damaged goods area
- Returns/refurbishment area

41 Perform Initial Stock Count

Set Initial Stock:

For each product → Stock tab → "Correct Stock"

Stock Correction:

- Select warehouse
- Enter actual quantity on hand
- Add movement label (e.g., "Initial stock count")
- Save correction

Best Practice:

Conduct physical count before go-live to ensure accurate starting inventory values.

42 Manage Stock Movements

Types of Stock Movements:

Movement Type	Direction	When to Use
Stock In	Increase	Purchase receipts, returns from customers, production
Stock Out	Decrease	Sales shipments, damaged goods, samples
Transfer	Between warehouses	Moving stock between locations
Correction	Adjust	Physical count adjustments, errors

Automatic Movements:

Stock is automatically adjusted when:

- Validating customer shipment (decreases stock)
- Validating supplier reception (increases stock)
- Processing returns

43 Set Up Stock Alerts

Configure Alerts:

For each product → Stock tab → Set "Alert stock"

Alert Levels:

- **Minimum stock:**

Reorder point

- **Desired stock:**

Optimal level

- System alerts when stock falls below minimum

View Alerts:

Products/Services → Stock → "Products with low stock"

44 Conduct Stock Audits

Regular Physical Counts:

Schedule periodic stock audits (monthly, quarterly, annually)

Audit Process:

1. Export current stock report from Dolibarr
2. Conduct physical count in warehouse
3. Compare physical count vs system records
4. Investigate and document discrepancies
5. Make stock corrections in Dolibarr
6. Update stock valuation if needed

Cycle Counting:

Instead of counting all inventory at once, implement cycle counting - regularly count portions of inventory throughout the year.

Phase 11: Reports & Business Intelligence

Generate insights and monitor business performance

45 Access Built-in Reports

Report Categories:

Financial Reports

Sales by customer, Receivables aging, Payables aging, Cash flow

Sales Reports

Sales by product, Sales by period, Sales by region, Conversion rates

Inventory Reports

Stock levels, Stock movements, Stock valuation, Reorder lists

Customer Reports

Customer list, Sales by customer, Outstanding invoices

Management Reports

P&L statement, Balance sheet, Cash position, KPIs

Activity Reports

User activity, Document generation, System usage

Sales Report:

- Navigate: Home → Statistics → Invoices
- Filter by: Date range, customer, product
- View: Charts and detailed lists
- Export: PDF or CSV

Accounts Receivable Aging:

- Navigate: Invoices → Reports → Unpaid invoices
- View invoices grouped by age (0-30, 31-60, 60+ days)
- Identify overdue accounts
- Take collection actions

Profit & Loss Statement:

- Navigate: Accounting → Reports → Income Statement
- Select period
- Review revenues and expenses
- Calculate net profit/loss

Balance Sheet:

- Navigate: Accounting → Reports → Balance Sheet
- View assets, liabilities, and equity
- Verify financial position

47 Set Up Dashboard

Customize Homepage:

Home → Setup → Home Page Setup

Add Widgets:

- Sales KPIs (monthly revenue, YTD sales)
- Outstanding invoices
- Low stock alerts
- Recent orders
- Cash position
- Task reminders

Role-Based Dashboards:

Different users can customize their dashboards to show relevant metrics for their role.

48 Export Data for Analysis

Export Options:

Most lists and reports can be exported to:

- **CSV:**
For Excel/spreadsheet analysis
- **PDF:**
For distribution and printing
- **Excel:**
Direct export (some modules)

Use Exported Data For:

- Advanced pivot tables and analysis
- Integration with BI tools
- Custom reporting
- Data backups

KPI	How to Track in Dolibarr	Target
Monthly Revenue	Statistics → Invoices → By month	Growth target %
Quote-to-Order Rate	Compare proposals vs orders	>40%
Average Order Value	Total sales / # of orders	Increase over time
Days Sales Outstanding	Receivables aging report	<30 days
Inventory Turnover	COGS / Average inventory	Industry benchmark
Gross Profit Margin	(Revenue - COGS) / Revenue	Target %

Phase 12: Best Practices & Optimization

Ensure successful long-term operation

50 Data Backup Strategy

Regular Backups:

- **Database:**

Daily automated MySQL backups

- **Files:**

Weekly backup of documents folder

- **Configuration:**

Backup config files monthly

Backup Tools:

Use cPanel backup, phpMyAdmin export, or command-line tools

Test Restoration:

Quarterly, test restoring from backup to ensure data integrity

Critical:

Store backups in multiple locations (local + cloud). Never rely on single backup location.

51 Security Best Practices

Security Checklist:

- ☐ Use strong passwords (12+ characters, mixed case, numbers, symbols)
- ☐ Enable HTTPS/SSL for all access
- ☐ Restrict admin access by IP address if possible
- ☐ Regular software updates to latest Dolibarr version
- ☐ Disable unnecessary modules
- ☐ Monitor user activity logs regularly
- ☐ Implement proper user permissions (least privilege)
- ☐ Remove/disable default admin account after setup
- ☐ Enable audit logs for critical operations

52 User Training Program

Training Phases:

Phase 1: Core Training (Week 1)

System navigation, basic operations, security practices

Phase 2: Role-Specific (Week 2-3)

Department-specific workflows, data entry, reporting

Phase 3: Advanced Features (Week 4)

Automation, integrations, customization

Phase 4: Ongoing Support

Refresher sessions, new feature training, Q&A

Training Materials:

Create quick reference guides, video tutorials, and FAQ documents specific to your company's processes.

53 System Maintenance Schedule

Frequency	Task	Responsible
Daily	Check system logs, Monitor performance, Review alerts	System Admin
Weekly	Review user activity, Check backups, Update reports	System Admin
Monthly	Review permissions, Archive old data, Performance tuning	IT Manager
Quarterly	System updates, Security audit, User training refresher	IT Manager
Annually	Major upgrades, Comprehensive audit, Strategy review	Management

54 Performance Optimization

Database Optimization:

- Regularly optimize database tables
- Archive old records (closed fiscal years)
- Index frequently queried fields
- Monitor database size and growth

Server Resources:

- Monitor CPU and memory usage
- Configure PHP memory limits appropriately
- Enable caching where possible
- Use CDN for static files (optional)

File Management:

- Compress old documents
- Organize document folders
- Delete temporary files regularly
- Monitor disk space usage

55 Continuous Improvement

Regular Review Sessions:

Monthly meetings to:

- Identify process bottlenecks
- Gather user feedback
- Review system performance
- Plan enhancements

Stay Updated:

- Follow Dolibarr release notes
- Join Dolibarr community forums
- Test new features in staging environment
- Plan upgrades carefully

Process Documentation:

- Document standard operating procedures
- Create workflow diagrams
- Maintain configuration documentation
- Update as processes evolve

✓ Success Metrics:

- User adoption rate >90%
- Data accuracy >95%
- System uptime >99%
- User satisfaction score >4/5
- Process efficiency improvement 20%+

Implementation Completion Checklist

Before Going Live:

- ☐ All company information configured correctly
- ☐ Essential modules activated and configured
- ☐ User accounts created with proper permissions
- ☐ Product catalog imported and verified
- ☐ Customer and supplier data migrated
- ☐ Chart of accounts set up
- ☐ Bank accounts configured
- ☐ Tax rates and payment terms defined
- ☐ Warehouses created and initial stock entered
- ☐ Document numbering configured
- ☐ All users trained on their roles
- ☐ Test transactions completed successfully
- ☐ Backup system tested and working
- ☐ Security measures implemented
- ☐ Support procedures documented
